#### **EARNINGS SURPRISES**

Earnings surprise is the difference between a company's announced earnings and the average analyst estimated value. Surprises typically causes the stock price to jump and are often followed by more of the same surprise type.

#### Surprise Summary (Last 12 Quarters)

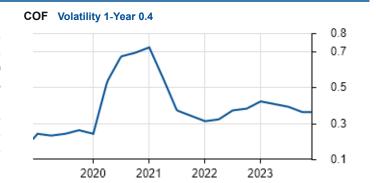

| Surprise Type                | Amount | Percent |
|------------------------------|--------|---------|
| Positive Quarters (> 2%)     | 8      | 66.7%   |
| Negative Quarters (< 2%)     | 4      | 33.3%   |
| In-Line Quarters (within 2%) | 0      | -       |

Financial Services / Credit Services

Overall Rating vs. Peers

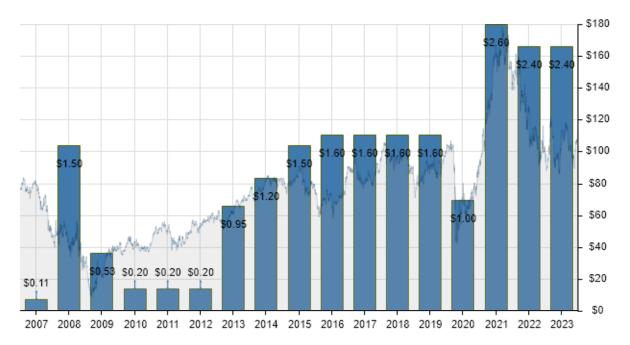

Ratings scores are relative to industry groups. They compare key metrics to rank stocks vs. their competitors. For example, higher growth than peers will score high even when the absolute growth is below the market average.

| Growth vs F   | Peers  |   |  |  |  |   |   |   |  |

# Capital One Finl (COF) Financial Services / Credit Services

#### **WARNINGS**

Name Severity Details

Negative Sales Growth Years Low Number of Years: 4; Sales 1Y Chg (%): 9.0%

In the last decade this company has had several years with negative revenue growth. If the top-line sales are shrinking this company could be a value trap that looks inexpensive on some measures but never outperforms the market.

High Stock Based Compensat... Low ► Compensation Yield: 1.0%

Stock based compensation is a drag on the return to investors. The Compensation Yield metric shows the percent of the market cap that has been given to managers and employees over the last year alone. This dilutes the value of all other shareholders.

Number of Earnings Misses Low Number of Quarters: 4; EPS Surprise: 36.92%

Over the past 10 quarters there have been several earnings misses. Historically, meeting or beating estimates is twice as common as missing. Frequent misses are a warning sign to investigate.

#### **REPORT TIPS**

#### **Metric Definitions**

Metric descriptions are available at stockrover.com/help/metrics/metric-overview

#### **Quantitative Scores**

Our scores analytics is to offer our concise analysis of a stock in powerful, but easy to digest format. Each of the composite score metrics are designed to use the best available accounting practices as well as source data from SEC filings. The scores are computed for a company vs. the market as a whole.

#### Fair Value

Fair value performs a forecasted discounted cash flow analysis of a company to determine the company's intrinsic value based on the expected future cash flows the company will produce. It basically determines what a company is worth based on how much cash flow it is expected to generate for you in the future, taking into account the time value of money and the predictability of those forecasted cash flows.

#### <u>Peers</u>

Peer ratings are computed from raking companies in the same
